NightStar's Illuminated **Regulatory** Traffic Signs

- Are highly visible, designed to be seen at longer distances than traditional signs.
- Are visible during rain, sleet, snow, & fog.
- Contain sensors to illuminate them from dusk to dawn and in harsh weather conditions.
- Can operate on local AC and solar power.
- Recognizable from the side at night due to the glow of the red & white illumination.
- Snow, mud, road salt, and graffiti resistant.
- GPS, anti-theft systems, maintenance alerts, smart-sign, connectivity, & technology options.
- *Studies have shown that lighted signs reduce blow through by 52% (Gates, 2004).*

NightStar makes illuminated signs in all sizes, shapes and colors including Freeze Warnings, School Zones, Crosswalks, Animal Crossings, etc.

NightStar designs and builds illuminated directional & guide signs, street name signs, special purpose signs for airports, railroads, busing, tollways, parking, and custom signs. Additional features may include anti-graffiti, mud, ice, snow & salt resistant coatings. Illuminated smart signs include a variety of options for solar, GPS, anti-theft, data collection, analytics, and connectivity.

NightStar's illuminated signs feature a combination of white LEDs and a proprietary lens design to light up your night-time driving experience.

NightStar's mission is to save lives by illuminating signs for traffic, transportation, work zones, and road construction.

By automatically adjusting the level of illumination, NightStar can help improve visibility and make driving safer, even in the darkest of night.

Let's set up a time to talk about your specific needs.

Pricing, quotes, and warranty information are available on request.
