

April 30, 2023

The NightStar collects, stores, analyzes, and reports data from the NightStar signs into an easily digestible database. From reporting the environmental conditions, orientation, and location of the NightStar signs, to recognizing when maintenance is necessary, the NightStar asset tracking software communicates seamlessly with the NightStar signs to provide customers the information they need to improve safety on highways and roadways.

To login, click the TAB on one the [www.nightstartraffic.com](http://www.nightstartraffic.com) website:

See the **NIGHTSTAR ASSET TRACKER LOGIN** or go directly to <https://criticalassettracking.verizon.com/>
